INDEX TO AUTHORS

A

Abelson, Denis. See *Bondy, Abelson, Scheuer, Tseu, and Upton,* 47

Abelson, Hilda. See *Bondy, Abelson, Scheuer, Tseu, and Upton,* 47

Abraham, S., Cady, P., and **Chaikoff, I. L.** Effect of insulin *in vitro* on pathways of glucose utilization, other than Embden-Meyerhof, in rat mammary gland, 955

—. See *Morris, Chaikoff, Abraham, and Fansah,* 1039

Aisenberg, Alan C., and **Potter, Van R.** Studies on the Pasteur effect. II. Specific mechanisms, 1115

—, **Reinafarje, Baltazar,** and **Potter, Van R.** Studies on the Pasteur effect. I. General observations, 1099

Albright, Edwin C. See *Tomita, Lardy, Larson, and Albright,* 387

Allison, R. M., and **Burris, R. H.** Kinetics of fixation of nitrogen by *Azotobacter vinelandii,* 351

Anderson, J. W. See *Goldstein and Anderson,* 775

Ashmore, James, Cahill, George F., Jr., Hastings, A. Baird, and **Zottu, Sylvia.** Studies on carbohydrate metabolism in rat liver slices. VIII. Effect of ions and hormones on pathways of glucose-6-phosphate metabolism, 225

—. See *Cahill, Ashmore, Zottu, and Hastings,* 237

Avigad, Gad. See *Feingold, Avigad, and Hestrin,* 295

Axelrod, A. E. See *Martin and Axelrod,* 309

Axelrod, Julius. See *Strominger, Maxwell, Axelrod, and Kalckar,* 79

B

Bachhawat, Bimal K. See *Robinson, Nagle, Bachhawat, Kupiecki, and Coon,* 1

Ball, Charles D. See *Hamill, Byerrum, and Ball,* 713

—. See *Sato, Byerrum, and Ball,* 717

Ball, Eric G. See *Wolff and Ball,* 1083

Beck, Stanley D. See *Casida, Beck, and Cole,* 365

Bergmann, Felix. See *Dikstein, Bergmann, and Henis,* 67

Berthet, Jacques. See *Rall, Sutherland, and Berthet,* 463

Best, C. H. See *Young, Lucas, Patterson, and Best,* 341

Bloch, Eric, Dorfman, Ralph I., and **Pincus, Gregory.** The conversion of acetate to C_{19} steroids by human adrenal gland slices, 737

Bloch, Konrad. See *Johnston, Gautschi, and Bloch,* 185

—. See *Schneider, Clayton, and Bloch,* 175

Bogdanski, Donald S. See *Udenfriend, Weissbach, and Bogdanski,* 803

Bondy, Philip K., Abelson, Denis, Scheuer, James, Tseu, Theodore K. L., and **Upton, Virginia.** Determination of cortisol in human plasma by quantitative paper chromatography, 47

Boyer, P. D. See *Robbins and Boyer,* 121

Britton, Barbara. See *Wick, Drury, Nakada, and Wolfe,* 963

Bromberg, Philip A. See *Weissmann, Bromberg, and Gutman,* 407, 423

Brown, James R. See *Radin, Martin, and Brown,* 499

Buchanan, John M. See *Levenberg and Buchanan,* 1005, 1019

Burris, R. H. See *Allison and Burris,* 351

Bursa, Fahamet. See *Haurowitz, Zimmerman, Hardin, Lisie, Horowitz, Lietze, and Bursa,* 827

Byerrum, Richard U. See *Hamill, Byerrum, and Ball,* 713

—. See *Sato, Byerrum, and Ball,* 717

C

Cady, P. See *Abraham, Cady, and Chaikoff*, 955

Cahill, George F., Jr., Ashmore, James, Zottu, Sylvia, and **Hastings, A. Baird.** Studies on carbohydrate metabolism in rat liver slices. IX. Ionic and hormonal effects on phosphorylase and glycogen, 237

—. See *Ashmore, Cahill, Hastings, and Zottu*, 225

Carroll, Betty R. See *Kochakian, Carroll, and Uhri*, 811

Cartwright, G. E. See *Gubler, Cartwright, and Wintrobe*, 533

Casida, J. E., Beck, Stanley D., and **Cole, Margaret J.** Sterol metabolism in the American cockroach, 365

Caughey, Winslow S., Smiley, J. Donald, and **Hellerman, Leslie.** L-Glutamic acid dehydrogenase: structural requirements for substrate competition: effect of thyroxine, 591

Chaikoff, I. L. See *Abraham, Cady, and Chaikoff*, 955

—. See *Harold, Chapman, and Chaikoff*, 609

—. See *Kiyasu and Chaikoff*, 935

—. See *Morris, Chaikoff, Felts, Abraham, and Fansah*, 1039

Chapman, D. D. See *Harold, Chapman, and Chaikoff*, 609

Cheldelin, Vernon H. See *Cummins, King, and Cheldelin*, 323

—. See *King and Cheldelin*, 579

Cheng, Hsieh Fu. See *Walter, Haurowitz, Fleischer, Lietze, Cheng, Turner, and Friedberg*, 107

Chernigoy, Franz. See *Haydar, Chernigoy, Khatchadourian, and Kerr*, 707

Clarke-Lewis, Audrey. See *Bondy, Abelson, Scheuer, Tseu, and Upton*, 47

Clayton, R. B. See *Schneider, Clayton, and Bloch*, 175

Cole, Margaret J. See *Casida, Beck, and Cole*, 365

Cole, R. David, Geschwind, I. I., and **Li, Choh Hao.** Studies on pituitary lactogenic hormone. XV. *N*-Terminal residue analysis and *N*-terminal sequence analysis, 399

Colowick, Sidney P. See *Rafter and Colowick*, 373

Cook, Elton S. See *Smalt, Kreke, and Cook*, 999

Coon, Minor J. See *Robinson, Nagle, Bachhawat, Kupiecki, and Coon*, 1

Cooper, Cecil, and **Lehninger, Albert L.** Oxidative phosphorylation by an enzyme complex from extracts of mitochondria. IV. Adenosinetriphosphatase activity, 547

— and —. V. The adenosine triphosphate-phosphate exchange reaction, 561

Cori, Carl F. See *Crane, Field, and Cori*, 649

—. See *Helmreich and Cori*, 663

—. See *Kipnis and Cori*, 681

—. See *Madsen and Cori*, 899

Crane, Robert K., Field, Richard A., and **Cori, Carl F.** Studies of tissue permeability. I. The penetration of sugars into the Ehrlich ascites tumor cells, 649

Cummins, Joseph T., King, Tsoo E., and **Cheldelin, Vernon H.** The biological oxidation of sorbitol, 323

Cunningham, Lew. See *Privat de Garilhe, Cunningham, Laurila, and Laskowski*, 751

D

Dandliker, Walter B. See *Yasunobu and Dandliker*, 1065

Davis, Neil C., and **Smith, Emil L.** Purification and some properties of prolidase of swine kidney, 261

Davis, Sidney. The copper complexes of mono- and diiodotyrosine, thyronine, di- and triiodothyronine, and thyroxine, 759

De Luca, Hector F., Gran, Fredrik C., and **Steenbock, Harry.** Vitamin D and citrate oxidation, 201

Deutsch, H. F. Some properties of a human serum hyaluronic acid, 767

Diamant, E. J. See *Guggenheim and Diamant*, 861
Dikstein, Shabtay, Bergmann, Felix, and Henis, Yigal. Studies on uric acid and related compounds. IV. The specificity of bacterial xanthine oxidases, 67
Dorfman, Ralph I. See *Bloch, Dorfman, and Pincus*, 737
—. See *Ungar, Gut, and Dorfman*, 191
Drabkin, David L. See *Marsh and Drabkin*, 909
—. See *Yčas and Drabkin*, 921
Drury, Douglas R. See *Wick, Drury, Nakada, and Wolfe*, 963

E

Eich, Stephen. See *Melville, Eich, and Ludwig*, 871
Erlanger, Bernard F. Ornithine peptidases in *Bacillus brevis*, 1073
Estabrook, Ronald W., and Mackler, Bruce. The low temperature spectra of hemoproteins. II. Cytochromes of heart muscle preparations, 637

F

Fansah, N. O. See *Morris, Chaikoff, Felts, Abraham, and Fansah*, 1039
Fattal, Y. See *Guggenheim and Diamant*, 861
Feingold, David S., Avigad, Gad, and Hestrin, Shlomo. Enzymatic synthesis and reactions of a sucrose isomer α-D-galactopyranosyl-β-D-fructofuranoside, 295
Felts, J. M. See *Morris, Chaikoff, Felts, Abraham, and Fansah*, 1039
Field, Richard A. See *Crane, Field, and Cori*, 649
Fleischer, Sidney. See *Walter, Haurowitz, Fleischer, Lietze, Cheng, Turner, and Friedberg*, 107
Friedberg, Wallace. See *Walter, Haurowitz, Fleischer, Lietze, Cheng, Turner, and Friedberg*, 107
Futterman, Sidney, and Silverman, Milton. The "inactivation" of folic acid by liver, 31

G

Gautschi, F. See *Johnston, Gautschi, and Bloch*, 185
Geschwind, I. I. See *Cole, Geschwind, and Li*, 399
Goldstein, J., and Anderson, J. W. The isolation of γ-globulins from rat, guinea pig, and rabbit plasma, 775
Grabowski, Ruth. See *Wick, Drury, Nakada, and Wolfe*, 963
Gran, Fredrik C. See *De Luca, Gran, and Steenbock*, 201
Greenberg, David M. See *Ichihara and Greenberg*, 331
Gubler, C. J., Cartwright, G. E., and Wintrobe, M. M. Studies on copper metabolism. XX. Enzyme activities and iron metabolism in copper and iron deficiencies, 533
Guggenheim, K., and Diamant, E. J. Carbohydrate metabolism in pyridoxine-deficient rats, 861
Gut, Marcel. See *Ungar, Gut, and Dorfman*, 191
Gutman, Alexander B. See *Weissmann, Bromberg, and Gutman*, 407, 423

H

Hamill, Robert L., Byerrum, Richard U., and Ball, Charles D. A study of the biosynthesis of the methoxyl groups of lignin in tobacco plants, 713
Hamilton, Mary G. See *Petermann and Hamilton*, 725
Hardin, Richard L. See *Haurowitz, Zimmerman, Hardin, Lisie, Horowitz, Lietze, and Bursa*, 827
Harold, Franklin M., Chapman, D. D., and Chaikoff, I. L. Metabolism of cholestanol. I. Fate of cholestanol-4-C^{14} in the rat. II. Metabolic interrelations of cholestanol, epicholesterol, and Δ^4-cholestenone, 609
Hastings, A. Baird. See *Ashmore, Cahill, Hastings, and Zottu*, 225
—. See *Cahill, Ashmore, Zottu, and Hastings*, 237
Hatefi, Y. See *Huennekens, Hatefi, and Kay*, 435

Haurowitz, Felix, Zimmerman, Morris, Hardin, Richard L., Lisie, Sarah G., Horowitz, Jack, Lietze, Arthur, and **Bursa, Fahamet.** Condensation of proteins with thiocyanate, 827

—. See *Walter, Haurowitz, Fleischer, Lietze, Cheng, Turner, and Friedberg,* 107

Hauser, George, and **Karnovsky, Manfred L.** Rhamnose and rhamnolipide biosynthesis by *Pseudomonas aeruginosa,* 91

Haydar, George Abu, Chernigoy, Franz, Khatchadourian, Avedis, and **Kerr, Stanley E.** Incorporation of C^{14}-labeled glycine and formate by the acid-soluble guanine and adenine nucleotides of rat liver, 707

Hechter, Oscar. See *Resnick and Hechter,* 941

Hellerman, Leslie. See *Caughey, Smiley, and Hellerman,* 591

Helmreich, Ernst, and **Cori, Carl F.** Studies of tissue permeability. II. The distribution of pentoses between plasma and muscle, 663

Henion, Wallace F., and **Sutherland, Earl W.** Immunological differences of phosphorylases, 477

Henis, Yigal. See *Dikstein, Bergmann, and Henis,* 67

Hestrin, Shlomo. See *Feingold, Avigad, and Hestrin,* 295

Hiatt, Howard H. Glycogen formation via the pentose phosphate pathway in mice *in vivo,* 851

Hill, Robert L., and **Smith, Emil L.** Leucine aminopeptidase. VI. Inhibition by alcohols and other compounds, 209

Horowitz, Jack. See *Haurowitz, Zimmerman, Hardin, Lisie, Horowitz, Lietze, and Bursa,* 827

Howton, David R. See *Steinberg, Slaton, Howton, and Mead,* 841

Hudson, Perry B. See *Tsuboi and Hudson,* 879, 889

—. See *Tsuboi, Wiener, and Hudson,* 621

Huennekens, F. M., Hatefi, Y., and **Kay, L. D.** Manometric assay and cofactor requirements for serine hydroxymethylase, 435

I

Ichihara, Akira, and **Greenberg, David M.** Further studies on the pathway of serine formation from carbohydrate, 331

J

Johnston, J. D., Gautschi, F., and **Bloch, Konrad.** Isolation of lanosterol from "isocholesterol," 185

K

Kalckar, Herman M. See *Strominger, Maxwell, Axelrod, and Kalckar,* 79

Kapphahn, Joyce I. See *Lowry, Roberts, and Kapphahn,* 1047

Karnovsky, Manfred L. See *Hauser and Karnovsky,* 91

Kay, L. D. See *Huennekens, Hatefi, and Kay,* 435

Keller, Elizabeth B. See *Littlefield and Keller,* 13

Kerr, Stanley E. See *Haydar, Chernigoy, Khatchadourian, and Kerr,* 707

Khatchadourian, Avedis. See *Haydar, Chernigoy, Khatchadourian, and Kerr,* 707

King, Tsoo E., and **Cheldelin, Vernon H.** Glucose oxidation and cytochromes in solubilized particulate fractions of *Acetobacter suboxydans,* 579

—. See *Cummins, King, and Cheldelin,* 323

Kipnis, D. M., and **Cori, Carl F.** Studies of tissue permeability. III. The effect of insulin on pentose uptake by the diaphragm, 681

Kiyasu, John Y., and **Chaikoff, I. L.** On the manner of transport of absorbed fructose, 935

Kochakian, Charles D., Carroll, Betty R., and **Uhri, Barbara.** Comparisons of the oxidation of C_{19}-hydroxysteroids by guinea pig liver homogenates, 811

Kreke, Cornelius W. See *Smalt, Kreke, and Cook,* 999
Kupiecki, Floyd P. See *Robinson, Nagle, Bachhawat, Kupiecki, and Coon,* 1

L

Lardy, Henry A. See *Tomita, Lardy, Larson, and Albright,* 387
Larson, Frank C. See *Tomita, Lardy, Larson, and Albright,* 387
Laskowski, M. See *Privat de Garilhe, Cunningham, Laurila, and Laskowski,* 751
Laurila, Ulla-Riitta. See *Privat de Garilhe, Cunningham, Laurila, and Laskowski,* 751
Lehninger, Albert L. See *Cooper and Lehninger,* 547, 561
Levenberg, Bruce, and Buchanan, John M. Biosynthesis of the purines. XII. Structure, enzymatic synthesis, and metabolism of 5-aminoimidazole ribotide, 1005
— and —. XIII. Structure, enzymatic synthesis, and metabolism of (α-*N*-formyl)-glycinamidine ribotide, 1019
Li, Choh Hao. See *Cole, Geschwind, and Li,* 399
Lietze, Arthur. See *Haurowitz, Zimmerman, Hardin, Lisie, Horowitz, Lietze, and Bursa,* 827
—. See *Walter, Haurowitz, Fleischer, Lietze, Cheng, Turner, and Friedberg,* 107
Lisie, Sarah G. See *Haurowitz, Zimmerman, Hardin, Lisie, Horowitz, Lietze, and Bursa,* 827
Littlefield, John W., and Keller, Elizabeth B. Incorporation of C^{14}-amino acids into ribonucleoprotein particles from the Ehrlich mouse ascites tumor, 13
Lowry, Oliver H., Roberts, Nira R., and Kapphahn, Joyce I. The fluorometric measurement of pyridine nucleotides, 1047
Lucas, Colin C. See *Young, Lucas, Patterson, and Best,* 341
Ludwig, Martha L. See *Melville, Eich, and Ludwig,* 871

M

Mackler, Bruce. See *Estabrook and Mackler,* 899
Madsen, N. B., and Cori, Carl F. The binding of adenylic acid by muscle phosphorylase, 899
Maley, Gladys Feldott. Phosphorylations associated with the oxidation of external reduced diphosphopyridine nucleotide by rat liver mitochondria, 1029
Marinetti, G. V., Scaramuzzino, D. J., and Stotz, Elmer. Lipides of cytochrome oxidase, 819
Marsh, Julian B., and Drabkin, David L. The biosynthesis of cytochrome *c in vivo* and *in vitro,* 909
Martin, Charles J., and Axelrod, A. E. The proteolytic enzyme system of skin. I. Extraction and activation, 309
Martin, Frances B. See *Radin, Martin, and Brown,* 499
Maxwell, Elizabeth S. See *Strominger, Maxwell, Axelrod, and Kalckar,* 79
Mead, James F. See *Steinberg, Slaton, Howton, and Mead,* 841
Meister, Alton. See *Otani and Meister,* 137
Melville, Donald B., Eich, Stephen, and Ludwig, Martha L. The biosynthesis of ergothioneine, 871
Mommaerts, W. F. H. M. See *Rupp and Mommaerts,* 277
Morris, M. D., Chaikoff, I. L., Felts, J. M., Abraham, S., and Fansah, N. O. The origin of serum cholesterol in the rat: diet *versus* synthesis, 1039
Muntz, John A., and Murphy, John R. The metabolism of variously labeled glucose in rat liver *in vivo,* 971
—. See *Murphy and Muntz,* 987
Murphy, John R., and Muntz, John A. The metabolism of glucose in the perfused rat liver, 987
—. See *Muntz and Murphy,* 971

N

Nagle, Roy. See *Robinson, Nagle, Bachhawat, Kupiecki, and Coon,* 1

Nakada, Henry I. See *Wick, Drury, Nakada, and Wolfe,* 963

Neilands, J. B. See *Townsley and Neilands,* 695

Noll, Hans. The chemistry of some native constituents of the purified wax of *Mycobacterium tuberculosis,* 149

O

Oro, John F., and **Rappoport, D. A.** Formate metabolism by animal tissues. I. Metabolism of formate-C^{14} by isolated rabbit and rat jejunum, 489

Otani, Theodore T., and **Meister, Alton.** ω-Amide and ω-amino acid derivatives of α-ketoglutaric and oxalacetic acids, 137

P

Patterson, Jean M. See *Young, Lucas, Patterson, and Best,* 341

Pazur, John H., and **Tipton, Carl L.** The synthesis *in vivo* of lactose from glucose-1-C^{14} and galactose-1-C^{14} in the guinea pig, 381

Petermann, Mary L., and **Hamilton, Mary G.** The purification and properties of cytoplasmic ribonucleoprotein from rat liver, 725

Pincus, Gregory. See *Bloch, Dorfman, and Pincus,* 737

Potter, Van R. See *Aisenberg and Potter,* 1115

—. See *Aisenberg, Reinafarje, and Potter,* 1099

Privat de Garilhe, M., Cunningham, Lew, Laurila, Ulla-Riitta, and **Laskowski, M.** Studies on isomeric dinucleotides derived from deoxyribonucleic acid, 751

R

Radin, Norman S., Martin, Frances B., and **Brown, James R.** Galactolipide metabolism, 499

Rafter, Gale W., and **Colowick, Sidney P.** On the action of pyrophosphate on 3-phosphoglyceraldehyde dehydrogenase, 373

Rall, T. W., Sutherland, Earl W., and **Berthet, Jacques.** The relationship of epinephrine and glucagon to liver phosphorylase. IV. Effect of epinephrine and glucagon on the reactivation of phosphorylase in liver homogenates, 463

Rappoport, D. A. See *Oro and Rappoport,* 489

Reinafarje, Baltazar. See *Aisenberg, Reinafarje, and Potter,* 1099

Resnick, Oscar, and **Hechter, Oscar.** Studies on the permeability of galactose in muscle cells of the isolated rat diaphragm, 941

Robbins, E. A., and **Boyer, P. D.** Determination of the equilibrium of the hexokinase reaction and the free energy of hydrolysis of adenosine triphosphate, 121

Roberts, Mary Louise. See *Crane, Field, and Cori,* 649

Roberts, Nira R. See *Lowry, Roberts, and Kapphahn,* 1047

Robinson, William G, Nagle,. Roy, Bachhawat, Bimal K., Kupiecki, Floyd P., and **Coon, Minor J.** Coenzyme A thiol esters of isobutyric, methacrylic, and β-hydroxyisobutyric acids as intermediates in the enzymatic degradation of valine, 1

Rose, William C. See *Womack, Snyder, and Rose,* 793

Rosenkrantz, Harris. Studies in vitamin E deficiency. III. The estimation of tissue tocopherol with phosphomolybdic acid, 165

Rupp, Joseph C., and **Mommaerts, W. F. H. M.** The scattering of light in myosin solutions. II. A determination of the molecular weight, 277

S

Saidel, Leo J. A ninhydrin reaction differentiating *N*-terminal glycine peptides from other peptides, 445

Sato, Clifford S., Byerrum, Richard U., and **Ball, Charles D.** The biosynthesis of pectinic acid methyl esters through transmethylation from methionine, 717

Scaramuzzino, D. J. See *Marinetti, Scaramuzzino, and Stotz,* 819

Scheuer, James. See *Bondy, Abelson, Scheuer, Tseu, and Upton,* 47

Schneider, Peter B., Clayton, R. B., and **Bloch, Konrad.** Synthesis of lanosterol *in vivo,* 175

Silverman, Milton. See *Futterman and Silverman,* 31

Slaton, William H., Jr. See *Steinberg, Slaton, Howton, and Mead,* 841

Smalt, Sister Marie Augustine, Kreke, Cornelius W., and **Cook, Elton S.** Inhibition of enzymes by phenylmercury compounds, 999

Smiley, J. Donald. See *Caughey, Smiley, and Hellerman,* 591

Smith, Emil L. See *Davis and Smith,* 261

—. See *Hill and Smith,* 209

Snyder, Barbara B. See *Womack, Snyder, and Rose,* 793

Steenbock, Harry. See *De Luca, Gran, and Steenbock,* 201

Steinberg, Gunther, Slaton, William H., Jr., Howton, David R., and **Mead, James F.** Metabolism of essential fatty acids. V. Metabolic pathway of linolenic acid, 841

Stotz, Elmer. See *Marinetti, Scaramuzzino, and Stotz,* 819

Strominger, Jack L. Microbial uridine-5′-pyrophosphate *N*-acetylamino sugar compounds. I. Biology of the penicillin-induced accumulation, 509

—. II. Incorporation of uracil-2-C^{14} into nucleotide and nucleic acid, 525

—, **Maxwell, Elizabeth S., Axelrod, Julius,** and **Kalckar, Herman M.** Enzymatic formation of uridine diphosphoglucuronic acid, 79

Sutherland, Earl W. See *Henion and Sutherland,* 477

Sutherland, Earl W. See *Rall, Sutherland, and Berthet,* 463

T

Tallan, Harris H. Studies on the distribution of *N*-acetyl-L-aspartic acid in brain, 41

Tipton, Carl L. See *Pazur and Tipton,* 381

Tomita, Kenkichi, Lardy, Henry A., Larson, Frank C., and **Albright, Edwin C.** Enzymatic conversion of thyroxine to tetraiodothyroacetic acid and of triiodothyronine to triiodothyroacetic acid, 387

Townsley, P. M., and **Neilands, J. B.** The iron and porphyrin metabolism of *Micrococcus lysodeikticus,* 695

Tseu, Theodore K. L. See *Bondy, Abelson, Scheuer, Tseu, and Upton,* 47

Tsuboi, K. K., and **Hudson, Perry B.** Enzymes of the human erythrocyte. I. Purine nucleoside phosphorylase; isolation procedure, 879

— and —. II. Purine nucleoside phosphorylase; specific properties, 889

—, **Wiener, G.,** and **Hudson, Perry B.** Acid phosphatase. VII. Yeast phosphomonoesterase; isolation procedure and stability characteristics, 621

INDEX TO SUBJECTS

A

Acetate: Steroids, C_{19}, from, adrenal glands, *Bloch, Dorfman, and Pincus,* 737

Acetic acid: Oxal-. *See* Oxalacetic acid
Tetraiodothyro-. *See* Tetraiodothyroacetic acid
Triiodothyro-. *See* Triiodothyroacetic acid

Acetobacter suboxydans: Cytochromes, *King and Cheldelin,* 579
Glucose oxidation, *King and Cheldelin,* 579

Acetyl-L-aspartic acid: *N*-, brain, *Tallan,* 41

Acrylic acid: Meth-. *See* Methacrylic acid

Adenine nucleotide(s): Liver, C^{14}-formate incorporation into, *Haydar, Chernigoy, Khatchadourian, and Kerr,* 707
—, C^{14}-glycine incorporation into, *Haydar, Chernigoy, Khatchadourian, and Kerr,* 707

Adenosinetriphosphatase: Phosphorylation, oxidative, relation, *Cooper and Lehninger,* 547

Adenosine triphosphate: Hydrolysis, free energy, *Robbins and Boyer,* 121
-Phosphate exchange reaction, phosphorylation, oxidative, relation, *Cooper and Lehninger,* 561

Adenylic acid: Muscle phosphorylase, effect, *Madsen and Cori,* 899

Adrenal(s): Acetate conversion to C_{19} steroids, *Bloch, Dorfman, and Pincus,* 737

Alcohol(s): Leucine aminopeptidase, effect, *Hill and Smith,* 209

Amide: ω-, α-ketoglutaric and oxalacetic acids, derivatives, *Otani and Meister,* 137

Amidinase: Trans-. *See* Transamidinase

Amino acid(s): Carbon 14-labeled, incorporation into ribonucleoprotein, Ehrlich ascites tumor, *Littlefield and Keller,* 13
ω-, α-ketoglutaric and oxalacetic acids, derivatives, *Otani and Meister,* 137

Aminoimidazole ribotide: 5-, synthesis, enzymatic, metabolism and structure, *Levenberg and Buchanan,* 1005

Androstene-3α,17β-diol: Δ^4-, metabolism *in vitro, Ungar, Gut, and Dorfman,* 191

Androstene-3β,17β-diol: Δ^4-, metabolism *in vitro, Ungar, Gut, and Dorfman,* 191

Ascites: Tumor, Ehrlich, C^{14}-amino acids incorporation into ribonucleoprotein, *Littlefield and Keller,* 13
—, —, sugar penetration, *Crane, Field, and Cori,* 649
See also Tumor
